

### ***The Epworth Sleepiness Scale***

How likely are you to doze off or fall asleep in the following situations, in contrast to feeling just tired? This refers to your usual way of life in recent times. Even if you have not done some of these things recently try to work out how they would have affected you. Use the following scale to choose the most appropriate number for each situation:

- 0 = no chance of dozing**
- 1 = slight chance of dozing**
- 2 = moderate chance of dozing**
- 3 = high chance of dozing**

Name: \_\_\_\_\_ Study Date: \_\_\_\_\_

**On your worst day rate the likeliness of sleep in these situations:**

<b>SITUATION</b>	<b>CHANCE OF DOZING</b>
Sitting and reading	
Watching TV	
Sitting inactive in a public place (e.g. theater or a meeting)	
As a passenger in a car for an hour without a break	
Lying down to rest in the afternoon when circumstances permit	
Sitting and talking to someone	
Sitting quietly after a lunch without alcohol	
In a car, while stopped for a few minutes in traffic	
<b>TOTAL</b>	

To check your sleepiness score, total the points. Check your total score to see how sleepy you are. Return Epworth Sleepiness Scale along with Sleep History & Medical History Questionnaires.

- A score of less than 8 indicates normal sleep function**
- 8-10, mild sleepiness**
- 11-15, moderate sleepiness**
- 16-20, severe sleepiness**
- and 21-24, excessive sleepiness**
